

Post-Event Proceedings for
'Nano and Microtechnologies in the Food and HealthFood Industries'
25th-26th October 2006
NH Grand Hotel Krasnapolsky, Amsterdam

Conference Themes

- Nano and micro technologies in food processing, monitoring, labelling, storage, distribution and related issues
- Using nano and micro technologies to meet the challenges of food for nutrition and food for health
- New techniques and technologies for rapid safety testing, and prevention of food borne disease
- Safety and regulatory issues related to the use of new technology
- The role of nano and micro technologies in food-related health issues and disease avoidance
