

David Tolfree

MANCEF

Chair Biography

David Tolfree

David Tolfree MSc., F.Inst.P., CPhys., F.IoN. was the Co-Founder and Executive Director of Technopreneur Ltd, a consultancy company for the exploitation of micro-nanotechnologies. He is one of the founders of MANCEF (Micro and Nanotechnology Commercialization Educational Foundation), an international body dedicated to commercialization and education, and is currently its European Vice-President. David is a Chartered Physicist, a Fellow of the Institute of Physics and is also a Fellow and one of the founders of the Institute of Nanotechnology and a member of its Advisory Board. He has published over 140 papers, including news articles, chapters for books, conference and journal papers, and has given interviews on television and radio, raising public awareness of micro-nanotechnology. He is internationally recognized as an authority on the exploitation of micro-nanotechnology and co-authored chapters in the MANCEF International Microsystems and Top-Down Nanotechnology Roadmap. He is currently the guest editor and contributor to the International Journal of Nanomanufacturing; and is also on the advisory boards of a number of international conferences and plays a prominent role in organizing MANCEF's conferences. His recent book, 'Commercialising Micro-Nanotechnology Products' was published in 2007 and he is currently co-authoring a book on 'Roadmapping Emergent Technologies.'
