

## Daniel Crespy

Daniel Crespy did a PhD in the field of colloid and polymer chemistry in the University of Ulm (Germany) where he synthesized and characterized a large variety of nanoparticles and nanocapsules. He is now working as project leader in the Laboratory for Protection and Physiology at Empa (Switzerland) since 2006. The current work is focused on the synthesis of novel stimuli-responsive membranes for smart clothing application. The stimuli investigated are the most physiologically relevant, i.e. the temperature and the humidity.
