

**Dr. Jan Beringer**

---

Dr. Jan Beringer has studied chemistry at the University of Stuttgart, Germany and did his PhD in textile and fiber chemistry. Beringer is the head of the department "Textile Services and Innovations" at the international Textile Research Centre Hohensteiner Institutes in Boennigheim, Germany. His field of work is textile Nanotechnology, intelligent/smart Textiles, textile UV-protection, textile reprocessing/care, textile services/leasing, textile finishing, colour measurement and whiteness assessment. As a textile chemist he is dealing with surface modification of fabrics through chemical and nanotechnology processes in textile finishing, modification of fibers, development of technical textiles and the performance assessment of functionalised textile products prior entering the market.

**Dr. Jan Beringer**

Director of the department Textile Services & Innovations
